Tubing and Wire***

ALASKAN COPPER

ALASKAN COPPER & BRASS COMPANY

History

When Alaskan Copper Works was founded as a marine coppersmithing company in 1913, one of its major activities was forming and brazing pipe and pipe fittings made from copper, brass and bronze, primarily for use in the Pacific Northwest shipbuilding industry.

Beginning in the 1920's, many of the area's growing process industries, such as pulp and paper, which had relied on wood stave and cast iron as corrosion resistant materials for their tanks and piping, welcomed the development of a new weldable alloy, silicon bronze. This alloy had special advantages in weight, cost and corrosion resistance. Alaskan Copper Works participated in the transition to this innovative metal and in the development of the welding techniques necessary for its proper fabrication.

In the 1930's, alloys with even better corrosion resistance, such as the austenitic stainless steels, became available and quickly came into general use not only in the pulp and paper industry but also in the other process industries then beginning to develop, such as

Alaskan Copper Works yesterday

petrochemical and food processing. Again, Alaskan Copper Works participated in the application of these new, advantageous materials and in the development of the welding and fabricating procedures required to maximize their usefulness.

Over the intervening years, improvements in our manufacturing capacities have seen the standard lengths of most pipe sizes increase from 4 feet to 10 feet and then to 20 feet. Die-formed smooth-flow

elbows began to be made in small sizes and gradually advanced to include larger sizes and many radii and wall thicknesses. Other advances over the years have led to tees being made with smooth-drawn outlets, the development of many available choices in the types of stub ends for different services and our manufacturing of pipe and fittings to advanced specifications and in "exotic" alloys, including our qualification to produce fittings for the nuclear power industry.

As a result, today's customers of the Stainless Products Division of Alaskan Copper Works benefit from the accumulated experience of one of the nation's largest organizations devoted exclusively to the manufacturing of pipe and pipe fittings in stainless steels, high-nickel alloys, duplex stainless alloys, copper-nickel alloys, aluminum, titanium, zirconium, copper and other weldable corrosion resistant alloys.

Alaskan Copper Works today.

Your Source for Corrosion Resistant Alloys

Alaskan Copper & Brass Company combines the largest and most diverse inventory of alloys in the Pacific Northwest with the very latest in material processing equipment. Our goal is to continue to be a true "service center" for our customers. We provide accurate, rapid quotation services and the ability to deliver material on time, preprocessed if necessary to our customer's exact specifications.

Northwest Owned and Operated

Alaskan Copper & Brass Company has been owned and operated by the same family since 1913. In our Seattle, Portland and Canadian distribution facilities, the emphasis has always been on personal service and long term relationships with our customers. Contract terms, credit terms and special stocking programs can be negotiated locally, with people who understand the Northwest market and its customers.

State of the Art Processing Equipment

Preprocessing of customer material has become more important every year due to more exacting quality requirements in most industries. Alaskan has responded to that demand by investing heavily in new processing equipment. Minimize scrap and save inventory costs! Let Alaskan do your material processing.

Customer Service our Specialty

Our sales staff is backed up by one of the most extensive information systems in the metals industry. Each salesperson has instantaneous access to all of our over 13,000 stocking items through a touch-input computer screen. Questions regarding the status of your order can be answered immediately, without a return call. We value your time as much as you do. This catalog covers sizes, weights and specifications of material for the commercial, military, marine, waste-water, petro-chemical, pharmaceutical, beverage and power industries. Call one of our informed and experienced salespeople for the rapid quotation response you expect in these competitive times.

ALASKAN COPPER PROCESSING CAPABILITIES

Coil Processing

Aluminum, brass, copper, copper-nickel and stainless steel coil stock from .010" through $\frac{3}{8}$ " thick and up to 96" wide are levelled and cut to length on Alaskan's custom-made line.

Shearing

Precision shearing from light gauge to $\frac{3}{8}$ " thick copper alloy material, $\frac{1}{2}$ " thick stainless steel and up to $\frac{3}{4}$ " thick aluminum. Sheet or plate can be sheared in 20 foot continuous lengths using an adjustable backgauge. Plate up to 1" thick can be sheared in lengths up to 48".

Sawing

Abrasive sawing of copper alloy material and stainless steel though 4" thick to close tolerance for rectangles and squares. Metal carbide sawing of aluminum plate through 6" thick. Plate up to 96" x 168" can be sawed in full lengths. Plate up to 12 foot long can be sawed with a +/- .005" inch tolerance.

Splice Welding

Simultaneous welding from both sides by automatic gas tungsten-arc process to achieve any required sheet size from stock material. The weld procedures and welder qualifications conform to Section IX of the ASME Boiler and Pressure Vessel Code. The resulting weld has minimum distortion and minimum reinforcement to allow easy forming such as rolling. Material up to 20 feet in length may be welded together.

Plasma Burning

Computerized automatic plasma burning of any shape can be accomplished. All corrosion resistant alloys can be cut up to 3" thick. Up to 96" x 240" material can be accommodated. A water table is utilized to keep slag and the heat affected zone to a minimum.

Do-All Sawing

Automatic multiple cutting up to 16" by 16" bar or 16" diameter round bar, rod or tubing.

Custom Fabrication

Custom fabrication of most industrial shapes can be performed by our affiliated company, ALASKAN COPPER WORKS. Work will be performed on a complete package basis including material or on a labor only basis utilizing the customer's material. The entire engineering and drafting department of ALASKAN COPPER WORKS is at your disposal, offering computerized design of heat transfer equipment, pressure vessels and tanks.

Alaskan's Cut-To-Length facility allows for efficient use of sheet and plate material.

Order the size that is needed, not just "standard" sizes.

Complex shapes are cut by computerized plasma cutting tables.

Aluminum wet pump pressure vessel used to transfer fish from a ship's hold to the dock.

Stainless Steel

300 Series Comparison Guide, Typical Analysis

T-304

<u>Element</u>	<u>Percent</u>	<u>Advantages</u>	<u>Applications</u>
Carbon	0.06%	Simple to fabricate and clean	Stainless steel sinks
Manganese	1.00%	Good corrosion resistance	Milk holding tanks
Silicon	0.50%	Economical maintenance	Brewing and distilling
Chromium	19.00%	Bright, smooth appearance	Food and chemical processing
Nickel	9.25%	Optimum strength-to-weight ratio	Stainless flatware
		Formability	Vacuum bottle liners
		High tensile strength	Pressure vessels for chemicals plants
			Nuclear plant storage tanks

T-304-L

<u>Element</u>	<u>Percent</u>	<u>Advantages</u>	<u>Applications</u>
Carbon	.025%	Resists intergranular corrosion	Dimple-sheet fabrication of tanks
Manganese	1.00%	High corrosion resistance	Vessels for thermal transfer
Silicon	0.50%	Easy to clean, fabricate	Nitrogen fertilizer towers
Chromium	19.00%	High strength-to-weight ratio	
Nickel	10.00%	Controls product contamination	

T-316

<u>Element</u>	<u>Percent</u>	<u>Advantages</u>	<u>Applications</u>
Carbon	.025%	Corrosion, heat resistant,	Chemical storage tanks
Manganese	1.00%	Easy maintenance	Pressure vessels
Silicon	0.50%	Close tolerances	Trays in distillation towers
Chromium	19.00%	Deep drawing	Components for pens
Nickel	13.00%	Superior creep strength	Marine, chemical environments
Molybdenum	3.50%	Good pitting resistance	

T-316-L

<u>Element</u>	<u>Percent</u>	<u>Advantages</u>	<u>Applications</u>
Carbon	.025%	Deep drawing ability	Tanks, piping and valves
Manganese	1.00%	Close tolerances	Food processing tanks
Silicon	0.50%	Good creep strength	Pails, containers, dicers
Chromium	17.00%	Easy to maintain	Tank trucks
Nickel	12.00%	Superior intergranular	Conveyors
Molybdenum	2.50%	Corrosion resistance	Panel walls

T-317-L

<u>Element</u>	<u>Percent</u>	<u>Advantages</u>	<u>Applications</u>
Carbon	.025%	Excellent corrosion resistance	Storage tanks for corrosive materials
Manganese	1.00%	Minimizes metallic contamination	
Silicon	0.50%	High creep and tensile strength	
Chromium	19.00%	High stress-to-rupture strength	
Nickel	13.00%		
Molybdenum	3.50%		

Stainless Steel Angle

Stainless Steel Angle - Even Leg and Uneven Leg

- Hot Rolled, Annealed, and Pickled
- Specifications: ASTM A 276
- Stocked in 20 to 22 foot random lengths

Stainless Steel Pipe

"Annealed" Welded and Seamless Comparison of Wall Thicknesses

- Alloys Stocked Include Types 304-L and 316-L. Other corrosion resistant alloys are available.
- Specifications: ASTM A 312
- Stocked in 17 - 24 foot random mill lengths, plain ends.
- "Annealed" pipe is used when the specifications referenced are required and is available only in the NPS diameters and schedule wall thickness shown. Welded "annealed" pipe is available per ASTM A 312, ASME SA-312 and ASTM A 358, A 376, A 409 and MIL-P-24691 (corrosion tested) and is stocked in most sizes through 24" diameter. Seamless "annealed" pipe is available per ASTM A 312 and MIL-P-24691 (corrosion tested) and is stocked through 4" size.

Dimensions are in inches, and are per ANSI B36.19 and ANSI B36.10. All weights are approximate, based on a metal density of .29 lb/in³. Alaskan will use the schedule thicknesses shown for all sizes not specified by a standard unless otherwise directed. Sizes not shown may be available upon request.

Stainless Steel Pipe

"As Welded" Pipe and Tubing Comparison of Wall Thicknesses

- Alloys Stocked Include Types 304-L and 316-L. Other corrosion resistant alloys are available.
- Stocked in exact 20 foot lengths.
- "As Welded" pipe and tubing is rolled and welded from ASTM A 240 material and is normally supplied untested. ASTM A 778 is considered to be the most applicable ASTM specification for "as welded" pipe and tubing. ASTM A 358 HT-O and ASTM A 409 HT-O also apply to "as welded" pipe but require more extensive testing. Non-standard diameters and cut lengths are available. ID size tubing is available.

“Annealed” Welded Stainless Steel Pipe

- Alloys Stocked Include Types 304-L and 316-L. Other corrosion resistant alloys are available.
- Specifications: ASTM A 312
- Stocked in 17 - 24 foot random mill lengths, plain ends.
- “Annealed” pipe is used when the specifications referenced are required and is available only in the NPS diameters and schedule wall thickness shown. Welded “annealed” pipe is available per ASTM A 312, ASME SA-312 and ASTM A 358, A 376, A 409 and MIL-P-24691 (corrosion tested) and is stocked in most sizes through 24" diameter.

Stainless Steel Tubing

"Annealed" Welded and Seamless Tubing

- Stocked in 20 foot random lengths
- Alloys stocked include types 304, 304-L, 316-L, and 317-L. Other corrosion resistant alloys are available.
- "Annealed" tubing is used when the specifications referenced below are arequired. This tubing is primarily used for instrumentation, heat exchangers and in some ornamental applications. Welded "annealed" tubing is available per ASTM A 249, ASME SA-249 and ASTM A 29 and is stocked to 4" OD and availalbe up tp 8" OD. Seamless "annealed" tubing is available per ASTM 213, ASME SA-213 and ASTM A 269 and available up to 6" OD.

Notes

Alaskan Quality is achieved through a rigorous program designed to get the right instructions to the right people, so that a product is fabricated correctly the first time.

Since our beginning in 1913, the **Alaskan Quality Program** has been continually analyzed, revised and improved to meet the increasing challenges and complexity of specifications for piping, fittings, and custom fabrication. Our current **Quality Program** allows us to create an assignment of responsibility for engineering, drafting, layout, purchasing, scheduling, fabrication, examination, documentation and packaging. Thus our goal...conformance to specification...is consistently shared with you, the Purchaser.

Alaskan's facilities for radiography, liquid penetrant examination, ultrasonic gaging, hydrotesting and dimensional checking further confirm the quality that the program creates. Our program of proven procedures also enables the certification of parts and pressure vessels with the symbols of UM, U and U2 in accordance with Section VIII of the ASME Boiler and Pressure Vessel Code. Your purchase of **Alaskan** quality-crafted products will enable us to share with you our experience, knowledge and dependability.

Hydrotesting verifies pressure capabilities of pipe and tubing.

Heat-treatment stress relieves fittings after forming.

Geometric accuracy is checked on all Alaskan fittings.

Specialized film reader and digital densitometer are used in interpreting radiographic film.

Radiographic inspection checks the integrity of welds.

ALASKAN COPPER

Alaskan Copper & Brass Company and Alaskan Copper Works are the nation's largest combination full service center and manufacturer of corrosion resistant alloy products.

The following publications from Alaskan Copper & Brass Company and Alaskan Copper Works are available upon request.

• **Mill Products Stock List**

*Copper, Brass, Bronze,
Aluminum and Stainless Steel
Sheet, Plate, Bar, Pipe
Tubing, Fittings and Flanges*

Alaskan Copper & Brass Company

Fax (206) 382-7335 Portland, Oregon Fax (503) 238-6849 Vancouver, B.C. FAX (604) 937-0838

• **Stainless Steel Piping Products**

*Stainless Steel and Other
Corrosion Resistant Metal
Pipe, Flanges and Fittings*

*Alaskan Copper Works
Stainless Products
Division*

Fax (206) 382-7346

• **Fabrication Division**

*Corrosion Resistant Alloy Heat
Exchangers, Pressure Vessels, Tanks,
Columns, Special Fabrications and
Prefabricated Piping Systems*

*Alaskan Copper Works
Fabrication Division*

Fax (206) 382-4306

• **Copper-Nickel Products**

*Copper-Nickel Sheet, Plate,
Bar, Pipe, Tubing, Fittings
and Flanges*

Alaskan Copper Works

Fax (206) 382-7335

• **Bosses and Welding Outlets**

*Branch Outlets Available in
Copper-Nickel, Nickel-Alloys,
Stainless Steel and Other
Corrosion Resistant Alloys*
